

Mohamed Abdi

Phoenix, AZ | [REDACTED] | mo77abdi@gmail.com

EDUCATION

Arizona State University

Aug 2024 – May 2027

Bachelor of Engineering

Major in Informatics

Relevant Coursework: Data Analysis, Software Engineering; Operating Systems; Algorithms;

EXPERIENCE

The Global Career Accelerator

Arizona State University – Phoenix, AZ

Jan 2024 – May 2024

Trainee

- Built and deployed front-end web applications using HTML, CSS, Bootstrap, and JavaScript, improving design efficiency and user engagement.
- Optimized responsive designs, ensuring seamless user experiences across desktop and mobile platforms.
- Collaborated with a team on a real-world project for Publicis Sapient, involving prototyping, user research, and product management.
- Enhanced professional skills through coaching sessions, networking events, and direct mentorship from industry professionals, preparing for impactful roles in tech and design

The Global Career Accelerator

Arizona State University – Phoenix, AZ

Jan 2025 – Present

Trainee

- Analyzed real-world datasets in Jupyter Notebook, producing actionable insights and recommendations
- Communicated data analysis results verbally, in writing, and by creating visualizations in Tableau
- Examined user behavior across various industries and scenarios, identifying key trends and patterns
- Collaborated with a diverse global team to complete tasks and deliver timely and accurate projects

PROJECTS

CRUD-Based Task Management Application

Dec 2024

- Developed a web-based task management application with full CRUD functionality (Create, Read, Update, Delete) to streamline task tracking and organization.
- Designed and implemented a secure and scalable backend using Node.js and Express.js, with a SQL database for efficient data storage and retrieval.
- Built a responsive and intuitive user interface using Bootstrap and custom CSS, ensuring compatibility across devices and browsers.
- Optimized performance by implementing RESTful APIs for seamless data communication between the client and server.

Intel Data Center Analysis (Project-Based Experience)

Global Career Accelerator, ASU

Mar 2024

- Conducted data analysis using SQL to compare U.S. regions on energy production and renewable usage to support Intel's site selection for a new data center
- Built data visualizations in Tableau to communicate findings clearly and effectively to stakeholders
- Gained hands-on experience with real-world datasets and tools like Tableau Cloud, simulating professional-level data workflows
- Developed strong skills in querying, cleaning, and aggregating data across multiple sources using joins, grouping, and calculated fields

ACTIVITIES

National Society of Black Engineers (NSBE) — Member

Arizona State University

Aug 2024 – Present

- Attended professional development events and workshops focused on engineering and career growth
- Collaborated with peers on STEM-related initiatives and networking opportunities

SKILLS

Technical Skills:

Front-End Development: HTML5, CSS3, Bootstrap 5, JavaScript ES6, DOM Manipulation, React.js, jQuery

Back-End Development: Node.js, Python, Express.js, REST APIs

Databases: SQL, PostgreSQL

Version Control: Git, GitHub

Certifications & Training: Certifications in HTML, CSS, SQL, Python, JavaScript (Global Accelerator program)
